Cameron Peirce

Hi, I am Cameron and I am 22 years old.
I am passionate about IT technical support, web development, game design, and cybersecurity. Though my IT job experience is limited, I've gained substantial knowledge through self-study, online courses, personal projects, and industry advice. My varied roles, including window cleaning, catering, and brief tech support in college, show my adaptability and work ethic. I aim to use my IT skills to create innovative solutions and improve efficiency while continuing to learn and contribute to meaningful projects with dynamic teams.

EXPERIENCE

Smear Clear, Tongham — *Window cleaning*

Jan 2022 - Mar 2023

Delivered high-quality window cleaning services to residential and commercial clients. Managed cleaning schedules and client appointments to ensure timely service. Maintained and organised cleaning equipment and supplies.

Farnborough Football Club, Farnborough — *Catering*

Mar 2016 - May 2020

Provided exceptional catering services during football matches and events. Managed inventory, ensuring adequate supplies and maintaining food safety standards. Coordinated with team members to deliver efficient and timely service.

The University of the Creative Arts, Farnham —IT technical support

Feb 2019 - Apr 2019

Assisted in troubleshooting and resolving IT issues for students and faculty. Supported software and hardware installation and maintenance, enhancing the overall IT infrastructure. Provided technical assistance and training to users, improving their proficiency and productivity.

PROJECTS

Panic Game Jam

https://danosg.itch.io/the-quiet-peaks

Worked as part of a team during a game jam to develop a horror game in 2 months within the Unity game engine. I was the lead level designer but also helped with programming and story.

Wild Game Jam

Another game with the same team but using the Godot game engine. This time I was also a lead programmer. Currently still working on this game in my spare time.

Various Websites

I have built numerous websites around many things. Clothing / e-commerce, window cleaning, video games, media servers.

Home Server

Administered & maintained a private server, including configuring software, managing user permissions, and ensuring server stability and security.

Social Media Bot

Developed an innovative bot for a social media platform capable of running commands, sending pictures, animations, and GIFs.

Spotify API Playlist

Mastered SQL and utilised its toolkit to develop a comprehensive database of most played songs, automating processes using Python.

Stocks Excel Calculator

Helped Create a detailed Excel spreadsheet to calculate annual profit on stocks, considering average percentage gains, taxes, and other factors.
